Edoxaban	
Edoxaban Tosylate-SSR-isomer CAS No:	Edoxaban Ester CAS No:
 <p>The structure shows a central benzothiazine ring system with a methyl group on the nitrogen. It is linked via a carbonyl group to a cyclohexane ring. The cyclohexane ring has a dimethylamino group (-N(CH₃)₂) and a carbonyl group attached to it. This carbonyl group is further linked to another carbonyl group, which is attached to a 4-chloropyridine ring.</p>	 <p>The structure is similar to the Edoxaban Tosylate-SSR-isomer, but the dimethylamino group is replaced by an ethyl ester group (-COOC₂H₅) on the cyclohexane ring.</p>
